EDUCATION

University of California, San Diego

Bachelor of Science, Computer Science

San Diego, CA

Expected: Dec 2028

- **Relevant Coursework:** Intro to OOP with Java (CSE11), Calculus (Math 20A)

Venkateshwar Global School

High School Diploma (Grade: 95%)

Delhi, India

May 2025

WORK EXPERIENCE

Dot Glasses

Remote

Data Science Intern | Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Jun. 2023 – Sep. 2023

- Analyzed global sales data to identify market opportunities, improving sales efficiency by ~12% through data-driven territory optimization and interactive visualizations.
- Applied multivariate linear regression and quartile analysis to forecast revenue trends.
- Built interactive heatmaps, enabling CEO to optimize sales strategy in high revenue EU markets.

UCSD Computer Science Society

San Diego, CA

Developer | MongoDB, Express.js, React, Node.js, Git, Figma

Oct. 2025 – Present

- Selected as 1 of 8 developers from 500+ applications (~1.6%) for competitive development team.
- Building platform for Sharad Aggarwal, Global Head of AI Strategy at Google, to connect builders and startups with young talent; collaborating cross-functionally with designers.
- Developing scalable application using MERN Stack with authentication and matching algorithms.

Freelance (Client Work)

Remote

Frontend Developer | React, Vite, Tailwind CSS, JavaScript, Vercel

Jul. 2025 – Sep. 2025

- Delivered SEO-optimized, fully responsive frontend using React, Tailwind and Vite for medical clinic.
- Managed lifecycle from design to deployment on Vercel.

PROJECTS

Cardio-Sync | Python, Arduino, AlexNet, MQTT, JavaScript

2023 – 2024

- Founded and built portable, low-cost ECG device to improve healthcare accessibility for underserved communities.
- Developed AI model for ECG wavelet analysis using Transfer Learning on AlexNet with MIT-BIH arrhythmia dataset.
- Created custom frontend portal on MQTT server for real-time ECG visualization; presented at Delhi Science Fair.

AI Document Q&A Bot | Python, LangChain, Ollama, ChromaDB, FAISS

May 2025 – Aug. 2025

- Architected and deployed scalable RAG application using LangChain and Ollama for intelligent document querying.
- Integrated ChromaDB and FAISS for rapid semantic search; built interactive web interface with Streamlit.

LEADERSHIP & RESEARCH

New York Academy of Sciences, Junior Academy

Remote

Team Lead, Mine2Mine Project

2024 – 2025

- Selected as 1 of 250 students in India for NYAS Junior Academy Fall 2024 cohort.
- Led global team researching sustainable mining through in-situ mining, carbon fracking, and CCUS.
- Pitched to 7+ U.S. professors including Dr. Steve Mackwell (NSF); declared Grand Finalist (#2/120 teams) by Swedish Academy of Sciences.

SKILLS

Languages: Python, Java, JavaScript, HTML/CSS, C++ (Arduino), Bash

Frameworks & Libraries: React, Tailwind CSS, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, LangChain, AlexNet, Ollama, Streamlit

Developer Tools: Git, GitHub, VS Code, Command Line, Arduino IDE, Jupyter Notebook, Command Line

Cloud & Databases: MySQL, ChromaDB, Vercel, MQTT
